

Sydney Girls High School

Science Work Experience Program 2005

All our students in Year 10 are involved in one week of work experience. Students are required to make contact with prospective employers and to make arrangements regarding placement for themselves. The process is closely monitored by the Careers Adviser.

The program is aimed at developing self-confidence, improving ability to cope with day-to-day work situations and assisting in making decisions about future careers.

Staff visit students during their week at work to support them, inquire as to progress and to assist with any problems.

I am looking for contacts across all fields of science that may have positions for one week of work experience. Our students are highly motivated and very capable, often operating well above their peers in other schools.

When: 1 week starting Monday November 14th

If you can act as a contact for me please email me at jstanger@sghs.nsw.edu.au and I can place you on our contact list.

Thanks,
Jeff Stanger
